

**ABOVE THE LIP:
Sexual Organs**

SYMPTOMS:

Vertical lines about the lips area show that the sexual organs are shrinking.

The following lifestyle choices can contribute to low reproductive organs:

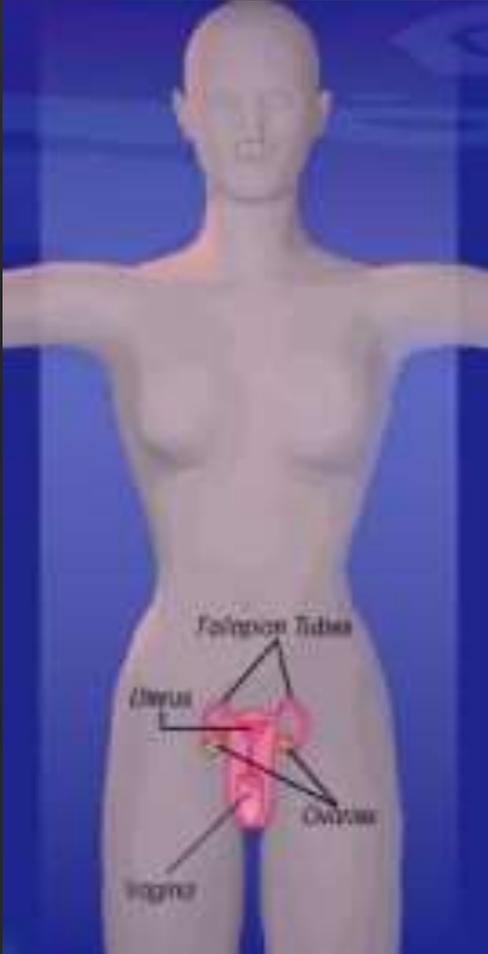

- Smoking
- Drinking alcohol
- Stress
- Prescription drugs
- High Blood Pressure
- Aging
- Depression
- Hormone Imbalance
- Low Thyroid or disease
- Anemia

Recommendations

- ⊗ Making a lifestyle change of healthy eating by adding more fruits and vegetables and exercising at least 30 minutes 4 times a week will make a difference.
- ⊗ Adding **Enhanced Water Get W.E.T.** to purified water aids in carrying oxygen and nutrients throughout the cells.
- ⊗ Eliminate animal protein and fatty foods
- ⊗ **Radiant Vitality** aids in digestion, circulation, and oxygen use in all organs. It contains vitamin and minerals that are essential for the body.

Recommendations

- ❁ **Radiant Cal-Mag** aids in reducing inflammation, calcium aids in reducing cramping, Magnesium strengthens the heart, Vitamin D3 is a steroid vitamin for hormones, bone health and absorbing calcium. Boron is a vital mineral that aids in managing arthritis, osteoporosis and menopausal.
- ❁ **Radiant Pure Plant Protein** made from 9 different plant sources giving the body 21 grams of protein. A safe and healthy protein for women that have and are battling breast cancer.
- ❁ **Radiant T Boost** giving the Thyroid the nutrients it needs for balance and Digest-zyme for better absorption.

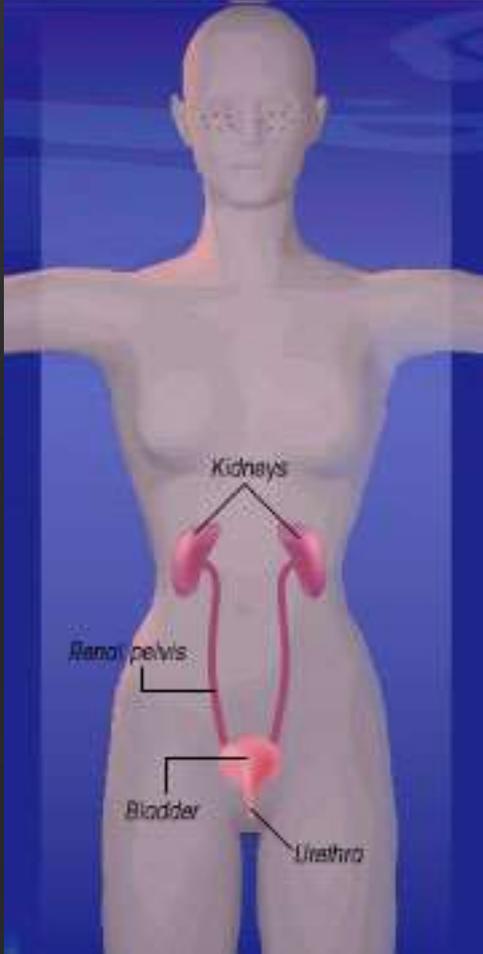

BENEATH THE EYES:
Kidneys

SYMPTOMS:

Swelling, puffiness and dark circles beneath the eyes are signs that the kidneys are functioning properly. Other symptoms of kidney problems include chills, fever, urinary urgency, bloating, abdominal pain, back pain, nausea, vomiting, and cloudy or bloody urine.

The two kidneys are in the upper abdomen, just below the liver and stomach. Each kidney contains about 1 million microscope blood-filtering units called nephrons. Every day, the kidneys filter about 42 gallons of blood. After the body cells have used their nutrients, they make waste products such as urea. The blood collects the waste products and excretory system the kidneys, ureters, bladder and urethra gets rid of them as yellowish fluid call urine.

Recommendations

- ☼ Drinking filtered water is very important, adding **Enhanced Water Get W.E.T.** aids in carries nutrients into cells and toxins out of the body.
- ☼ **Digest-zyme** is made of only live enzymes that aid in digesting and absorbing nutrients such as carbs, proteins, fats, starches, and glucose essential when eating a diet of processed and cooked foods. Enzymes are vital for proper digestion of nutrients and help control inflammation.
- ☼ **Radiant Probiotic:** aids in replenishing good flora (bacteria) and is known for enhancing the immune system and normalizes bacteria in the body.
- ☼ **Pure Radiance 7 Day Detox** is a safe and healthy detox recommending lots of fruits and vegetables, along with **Radiant Fiber Plus** and **Radiant Cleanse** that absorbs the toxins and moving them out of the body quickly.

SYMPTOMS:

Vertical lines between the eyes indicate problems with the liver and gall bladder. This shows an excess of animal and dairy foods in the diet.

These are signs of an unhealthy liver. The Liver stores nutrients, makes bile to help digest food, detoxifies poisonous chemicals, stores energy, makes blood, defends against germs, manufactures new proteins. The liver won't tell you it is sick most time it's too late.

BETWEEN THE EYES:
Liver

Recommendations

- ⊗ Drink 8 to 10 glasses of *Enhanced Water Get W.E.T.*, it makes water wetter. Water helps to get more oxygen and nutrients into the cells and toxins out of the body.
- ⊗ *Radiant Vitality* made from food with the highest source of nutrients.
- ⊗ *Digest-zyme* helps with digesting and absorbing nutrients.
- ⊗ Eat healthier by eating 6 to 8 servings of fresh fruits and vegetables a day. Eliminate eating processed foods from boxes or packages with chemicals and preservatives in them for a healthier liver.

CHIN:
Digestive System

SYMPTOMS:

Swollen lips indicate an expanded or flaccid digestive tract. Dark spots and recurring sores on the lips reveal ulceration and stagnation of blood in the digestive system. Lips with little coloration indicate that the blood in the small intestinal region is weak and absorption is poor. Acne and breakouts in the chin area indicate a weakened and overworked digestive system.

The digestive system includes the digestive tract, pancreas, gall bladder, and liver. The stomach is the widest part of the digestive tract. It is a muscle-walled bag that can expand to hold about ½ gallon of food and drink. As you eat a meal, the digestive system prepares for action, bile flows into the small intestine from the gall bladder along the bile duct. It digests mainly fatty foods. Digestive juices flow from the pancreas, along the pancreatic duct, into the small intestine. They digest mainly protein.

Recommendations

- ⊗ **Digest-zyme** is made of only live enzymes that aid in digesting and absorbing nutrients such as carbs, proteins, fats, starches, and glucose essential when eating a diet of processed and cooked foods. Live enzymes are known for giving relief from heartburn, indigestion, bloating, gas, and acid reflux. Enzymes are vital for proper digestion of proteins, other nutrients and help control inflammation.
- ⊗ **Radiant Probiotic** aids in replenishing good flora (bacteria) in the digestive system, giving relief from heartburn, indigestion, bloating, gas, acid reflux and leaky gut symptom. Probiotics enhance the immune system and normalizes the intestinal bacteria.

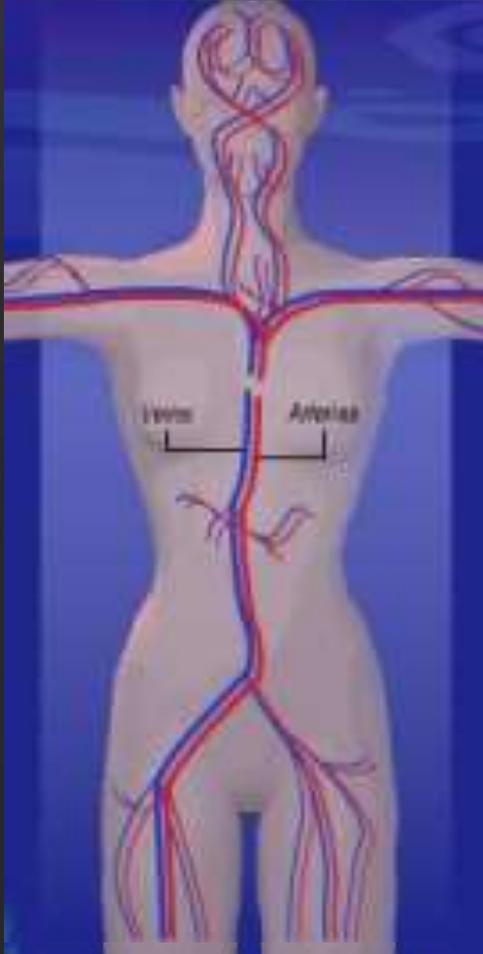

UPPER CHEEKS:
Circulatory

SYMPTOMS:

Spider veins and broken blood vessels these extremities may appear colorless, red or bluish that appear on the cheeks and nose are due to the lack of circulation and arterial spasm. Poor circulation can also result from varicose veins, which develop because of a loss of elasticity in the walls of the veins.

Blood flows from the heart along the arteries. These are thick, tough, and stretchy walls that withstand surge of blood pressure with each heartbeat. Arteries divide many times as they spread around the body and form millions of micro-blood vessels called capillaries. The capillaries join to make larger, thin-walled veins which return blood to the heart. Blood delivers nutrients and collects waste and carries white cells that fight germs and disease.

Recommendations

- ⊗ Eat a healthy diet of good fats such as raw nuts, avocados, olive oil, leafy greens, fruits, vegetables, grains and fish. Adding garlic to your diet helps to lower blood pressure, strength the heart muscle and thins the blood.
- ⊗ Exercise such a 20 minute walk 3 times a week all benefit the circulatory system.
- ⊗ Adding **Enhanced Water Get W.E.T.** to purified water aids in carrying oxygen and nutrients throughout the cells.
- ⊗ Eliminate animal protein and fatty foods
- ⊗ **Radiant Vitality** aids in digestion, circulation, and oxygen use in all organs. It contains vitamin B's needed for metabolism of fat, cholesterol and a natural diuretic that protects the heart.
- ⊗ **Radiant Cal-Mag** is essential in normal blood viscosity. Magnesium strengthens the heartbeat. will make the water wetter.

SYMPTOMS:

Deep lines in the forehead, both vertical and horizontal indicate problems in the intestines. Acne and redness in the skin can also be signs of sluggish colon.

The stomach breaks up the food with powerful squeezing actions and strong digestive chemicals. The soupy, partly digested food oozed into the next section, called the small intestine. More enzymes are mixed in for further chemical breakdown. The digested nutrients are absorbed into blood flowing through the lining of the small intestine. The large intestine is shorter, but much wider, than the small intestine. The small intestine is four times longer than the large intestine. The small intestine is an incredible 20ft long while the large intestine is only 5ft long.

FOREHEAD & LIPS:
Intestines

Recommendations

- ⊗ **Digest-zyme** is made of only live enzymes that aid in digesting and absorbing nutrients such as carbs, proteins, fats, starches, and glucose essential when eating a diet of processed and cooked foods. Enzymes are vital for proper digestion of proteins, other nutrients and to help control inflammation.
- ⊗ **Radiant Probiotic** aids in replenishing good flora (bacteria) throughout the small and large intestines which allows waste to move through smoother. Probiotics enhance the immune system and normalizes the intestinal bacteria.
- ⊗ **Radiant Fiber Plus** is rich with only fiber from whole foods that absorbs sugar, cholesterol, bad fats and slows absorption into the body, while transporting and sweeping through the small and large intestines.
- ⊗ **Radiant Cal-Mag**: Calcium, Magnesium and Vitamin D have been known as nutrient to help prevent colon cancer.

Recommendations

- ☼ Water is the most essential nutrient the body needs. Adding **Enhanced Water Get W.E.T** helps carry toxin out of the body.
- ☼ **Pure Radiance 7 Day Detox** is a safe and healthy detox recommending lots of fruits and vegetables, along with **Radiant Fiber Plus** and **Radiant Cleanse** that absorbs the toxins and moving them out of the body quickly.
- ☼ **Radiant Cleanse** is a natural plant laxative that moves the intestines quickly to give relief from constipation and a need for detoxing.

**LOWER JAW:
Hormonal**

SYMPTOMS:

Unwanted facial hair, discoloration of skin, acne and dryness are signs that will appear on the face in the jaw area. Other signs for hormones are fatigue, hot flashes, dizziness, headaches, depression, insomnia and weight gain.

The endocrine system works more slowly using chemicals called hormones. They help to regulate the amounts of nutrients, fluids, and minerals. It activates and controls long-term growth, from baby to adult. The endocrine glands make more than 50 different hormones. Each hormone circulates in the blood and affects the workings of certain areas, such as organs and tissues. The thyroid gland produces thyroxine, which controls how quickly cells use energy, also controlling the levels of the calcium in the bones and blood. The thymus gland makes hormones that help white blood cells regulate sodium and other minerals and help the body cope with stress and disease. The pea-sized pituitary gland just beneath the brain controls and coordinate the while endocrine

Recommendations

- ⊗ Eat a healthy diet mainly of fruits, vegetables, whole grains, good fats and fish.
- ⊗ Exercise at 3-4 times a week such as a brisk 30 minute walk.
- ⊗ As a woman matures with age it's important that she give her body adequate protein and nutrients, fueling her body with whole plant foods. Making sure she gets enough protein, **Pure Plant Protein** has 21 grams of protein made with 9 different plant sources.
- ⊗ **Radiant Vitality** aids in supplying the body with whole food vitamins and minerals.
- ⊗ **Radiant TBoost** gives the thyroid the nutrients it needs for balance and normal function, along with **Digest-zyme** for maximum absorption of nutrients.
- ⊗ Drink at least 8-10 glasses of filter water a day adding **Enhanced Water Get W.E.T.**

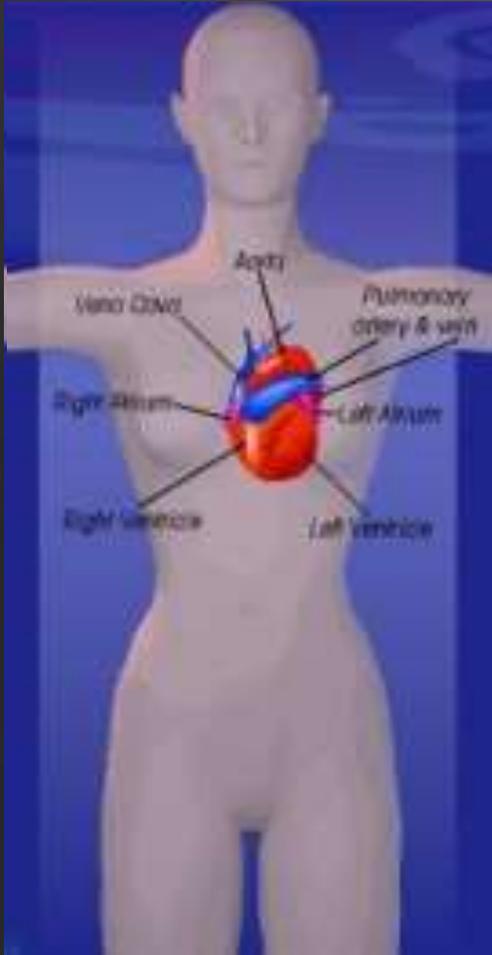

NOSE:
Heart

SYMPTOMS:

A soft swollen nose indicates that the heart is swollen from an intake of too much liquid. A hard swollen nose indicates fat deposits around the area of the heart caused by an excess of animal foods, dairy, and/or alcohol. Red and purple broken blood vessels around and on the nose is a sign that there is not enough blood flow through the heart.

The heart is the size of your fist and is made up of two pumps, which lie side by side. Those with spider veins may not be getting enough blood pumped through the heart therefore, not getting enough oxygen and blood flow.

Recommendations

- ⊗ American Heart Association states nutrient-rich foods such as fruits, vegetables, whole grains, low-fat dairy, raw nuts, fish, and poultry are best for a healthy heart. Those that have heart disease should avoid red meat and any type of sugary, processed foods.
- ⊗ A healthy heart includes physical activity at least 30 minutes per day to keep the cardiovascular system healthy and strong.
- ⊗ Drink at least 8 to 10 glasses of filter water a day. By adding **Enhanced Water Get W.E.T** to your water for slippery, un-sticky blood cells.
- ⊗ **Radiant Cal-Mag:** Calcium is important for maintenance of a regular heartbeat, lowers cholesterol levels, and helps to prevent cardiovascular disease. Magnesium helps to prevent cardiovascular disease and reduce cholesterol levels. Magnesium deficiencies are at the root of many cardiovascular problems.
